F-16 IFF Coupler Kit

SERD 65530

The F-16 IFF coupler kit solves the problem of over-the-air testing resulting in unreliable radiated power and transponder minimum trigger level testing in multi-path ramp and hangar environments.

The VIAVI F-16 IFF Coupler Kit provides isolated IFF Interrogator and Transponder testing to eliminate the need for DD-1494 frequency authorization. The interrogator coupler mounts over the aircraft's four element interrogator antenna array. The transponder coupler mounts over top and bottom transponder antennas.

Interrogator Coupler

Transponder Couplers

Features

- Interrogator coupler mounts over the aircraft's four element interrogator antenna array
- Transponder coupler mounts over top and bottom transponder antennas
- Interrogator coupler kit supports all blocks of F-16 aircraft
- Transponder coupler kit supports all F-16 blocks (except F-16A/B, blocks 10/20, new kit coming soon)
- Interfaces with most IFF ramp test equipment
- EMI gasketing eliminates stray transmissions and interference

Benefits

- Eliminates DD-1494 requirement
- Reliable effective radiated power
- Transponder minimum trigger level testing
